PACORD

SHIPBOARD AND
SHORE-BASED SYSTEMS
INSTALLATION, TESTING
AND MAINTENANCE FOR
THE WORLD'S FLEETS

Multifaceted Services with Unparalleled Expertise

A trusted source for systems installation, maintenance, overhaul, repair, integration and testing on virtually every single class of surface vessel in the United States Navy fleet.

A growing provider of technical support for naval and commercial marine systems such as electrical/electronics, combat, navigation, hydraulics and auxiliary

PacOrd, the service arm of the L-3 Communications/SPD Technologies companies, has been a leading provider of military and commercial marine systems installations, repairs and modifications for almost 50 years. The L-3/PacOrd team is composed of expert personnel in a wide range of technical fields, and has been assembled with the express purpose of delivering top-quality, cost-effective and on-time support services.

From shipboard electrical, electronic and mechanical systems to complex combat systems to shore-based installations, L-3/PacOrd tailors its services to respond directly to the customer's particular needs for an individual project. L-3/PacOrd has continually added new capabilities and expanded its number of expert technical personnel to support the latest state-of-the-art systems.

With facilities in close proximity to both private shipyards and Navy ports across the United States, as well as immediate response capabilities throughout the world, L-3/PacOrd is ready to meet the challenges associated with the maintenance of today's sophisticated ships and their onshore support facilities.
